Luxury Outdoor Movie Theaters

Luxury Outdoor Movie Theaters

PRESENTATION

We create and install private outdoor movie theaters worldwide.

Our customers are luxury hotels and passionate UHNW Individuals.

They're searching for extremely discreet outdoor AV solutions when OFF with no compromise on picture quality & screen size, customizable design of the complete system and true sound immersion when ON.

In 185" (4 x 2,5m), in 273" (6x3,5m) or in 360" (8x4,5m), our exclusive ECLIPSE Mega-Lift Platform® range is the perfect system to fulfill their wishes.

We offer Extra bright outdoor LED walls solutions or 4K Projection Display with a focus on design, ease of use and 5.2 to 9.2 customizable surrounding sound system.

We grow audiovisual dreams off the ground

OUR MISSION

We believe watching movies under the stars, quietly at home in the garden, can be an awesome experience.

This is also true for precious moments shared with friends and family watching a major sport event or a concert...

*We bring you the perfect solution for exclusive
Open-air Cinema experience*

Our mission is to combine aesthetism, technical expertise, ease of use, high picture quality and high fidelity sound system. Completely invisible in OFF position, our solutions are designed to be breathtaking when you simply press the ON Button.

Our dedicated Team and Partners are all driven by the will to create amazing experience for our customers.

LED Screen on Earth*

FREQUENTLY ASKED QUESTIONS

What is an Outdoor Movie Theater ?

An Outdoor Movie Theater is not just an outdoor TV, even in a large size. It's a complete movie theater in a sense that you benefit from GIANT picture size in which you can see all details even if you place yourself 10 to 20m distance from the screen.

Furthermore, all our giant screens come with surrounding exterior sound system with front speakers and subwoofers integrated in the screen structure AND surround speakers aesthetically placed (hidden in vegetation, fully retractable underground or fixed on a deck).

LED Wall Technology or Projection Display?

The choice between LED WALL Technology or PROJECTION Display for your project is up to you. Either of these two display technologies can be adapted to our screens and Lift Platforms. The reward is given to LED Wall Technology for use in bright daylight conditions but Projection Display does very well in 4K movie sessions under the stars.

We are here to understand your needs and explain benefits and drawbacks of both solutions. We'll figure out together which one is best suited for your project.

Can I get a bespoke screen size ?

Our screen range (185" / 273" / 360") is designed to be as close as possible of the 16:9 or 16:10 aspect ratio, taking into account the 50x50cm standard LED module size.

As bespoke outdoor screen manufacturer, we can also examine project faisability for other screen size as we use video scalers to adjust the picture on various screen sizes.

In Projection Display projects, other screen sizes can be made to order, to respect other desired aspect ratios (for example 1,85:1 or 2,35:1)

TECHNICAL DATAS

ECLIPSE LED RANGE (185" / 273" / 360" / Custom)

Technology : Outdoor IP 65 LED Wall
Brightness : 5500 nits (cd/m²) with light sensor included
Pitch : 3,9mm SMD (2,9mm SMD on demand)
Contrast Ratio : 5000:1
Lifecycle (50% loss of brightness) : 80.000 hours
Color Depth : 48 bits (16 bit per RGB Channel)
Picture Refresh rate : 3840Hz
Average power consumption : 680W/m²

ECLIPSE VP RANGE (185" / 273" / 360" / Custom)

Technology : Outdoor Projection Display	
Resolution : Full HD or 4K or 8K	(depending on the projector reference)
Brightness : 15000 to 37000 ANSI lumens	(depending on the projector reference)
Average illumination life : 3000 to 25000 hours	(depending on the projector reference)
Contrast Ratio : 5000/1 to 30000/1	(depending on the projector reference)

SOUND SYSTEM (Original Setup) (*)

Front Speakers (1 Left / 1 Center / 1 Right) : 750 Watts per unit
Surround Speakers (2 units, 4 or 6 optional) : 400 Watts per unit
Subwoofers (2 units) : 800 Watts per unit

(*) *Other Sound Setup and references can be selected in coordination with you and/or your AV integrator*
